## **DETAILED ACTION**

## Response to Amendment

- 1. This action is in response to the communication filed on May 16, 2005.
- 2. Claims 11, 13, 14, 16, 17 and 20 are pending in this action. Claims 11, 13, 14, 16 and 20 have been amended. Claims 1-10, 12, 15 and 18-20 have been canceled.

## Examiner Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark J. Young (Reg. No. 39,436) on June 27, 2005.

The application has been amended as follows:

IN THE CLAIM:

Please amend claims 11, as follows:

11. A network model database system adapted to categorize and store information, comprising:

a database schema including a plurality of primary branches, each primary branch including a plurality of record types and sets that connect the record types, each record type including a context code and a phrase value, said record types including a noun record type, a verb record type and an item record type, and

Application/Control Number: 09/639,961

Art Unit: 2654

a plurality of relationship branches establishing a relationship between each one of the plurality of primary branches and each other of the plurality of primary branches, each relationship branch includes a plurality of record types, said record type connecting primary branches and being configured to store relationship information between primary branches; and

said noun record type sharing relationship branches with each of said verb and item record types, and said verb record type sharing relationship branches with each of said noun and item record types, and said item record type sharing relationship branches with each of said verb and noun record types, and

a user interface configured for entering data,

said system being configured to automatically cross-reference the data and perform self-learning of relationship for the data.
